

MUSKAAN KHURANA

Business Analyst | CSPO®

Gurugram, India | khuranamuskaan13@gmail.com | +91 9813291401 | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Business Analyst who designs for scale, turning regulatory requirements into reusable product capabilities, not one-off fixes, with **3.5+ years** in fintech and healthtech. At a global wealth-tech firm, owned the analysis for a payments integration platform that cut new-implementation time by **67%**, hit a compliance deadline with **zero slippage**, and led an AI documentation initiative that reduced SME dependency by **83%**, now an organisational standard. Owns backlog prioritisation across 4 parallel projects with Product Owners and leads EU and UK client workshops. Designed human-in-the-loop guardrails for a firm-wide enterprise AI tool, piloting it to cut solution-design analysis by **~75%**.

PROFESSIONAL EXPERIENCE

Business Analyst, FNZ Technology

Gurugram, India | May 2025 - Present

Global wealth-management platform administering over US\$2 trillion in assets for banks and wealth managers.

- Owned end-to-end business analysis for a reusable payments integration platform built as a single point of change for future regulatory updates, cutting new-implementation time by **67%** and enabling faster, more consistent onboarding across concurrent client engagements, while contributing ROI estimation to support the initiative's business case.
- Delivered functional solution design across **6 concurrent regional implementations** spanning 2 jurisdictions in EU and UK markets, including one with a hard regulatory go-live deadline, specifying system behaviour for engineering and leading workshops with external clients and internal stakeholders to pressure-test design early.
- Owned sprint backlog prioritisation across **4 parallel projects** sharing a common domain model, protecting downstream delivery commitments by maintaining full sprint delivery under competing capacity demands and timelines, in partnership with the Scrum Master.
- Prioritised competing requirements from clients, stakeholders, and regulatory compliance, sequencing a fixed regulatory deadline and external commitments ahead of an internally proposed innovation initiative, hitting the compliance deadline with **zero slippage**.
- Led a cross-functional evaluation of an AI-assisted documentation process, defining success criteria and governance; the approach cut SME dependency by **83%**, accelerated defect resolution by 66%, and was adopted as a formal organisational standard.
- Designed the BA workflows, governance, and guardrails for an internal enterprise AI tool made available firm-wide and adopted by BA teams across FNZ's global regions, defining where human-in-the-loop review is mandatory; piloted it on solution-design reviews, cutting analysis time by **~75%** in early testing.
- Designed configurable REST APIs for a new multi-tenant platform, enabling project-specific integration fields while minimising API rework for future project onboarding through a reusable integration layer.
- Authored user stories and acceptance criteria for a global wealth management platform, reducing requirement clarifications by **~60%**, and defined a risk-based UAT strategy that cut test execution effort by **~50%** while preserving full regulatory coverage.

Business Quality Analyst, Rxlogix Corporation

Noida, India | Mar 2023 - May 2025

Moved from QA into business analysis within the first year, writing requirements and user stories with the Product Owner for pharmacovigilance software used by global life-sciences clients.

- Translated complex regulatory and business requirements into clear user stories and acceptance criteria, reducing requirement-related defects by **~20%** through early gap identification.
- Built and maintained a traceability matrix for a full release spanning **30 user stories across 5-6 features**, ensuring end-to-end requirement coverage throughout the release cycle.
- Caught requirement gaps before they reached QA, sustaining **95%+ defect-free** delivery across compliance-driven releases in a highly regulated environment, helping secure a client contract renewal accompanied by positive client feedback.
- Led SQL-based defect trend and root-cause analysis to drive data-backed prioritisation decisions alongside the Product Owner, reducing recurring issues by **~15%** and accelerating feature delivery timelines by 20%.
- Mentored **7 new team members** on BA-QA best practices, defect management, and stakeholder collaboration, shortening onboarding time.

SKILLS

Technical Skills: SQL-Based Analysis, REST API Design & Specification, Postman, Insomnia, Generative AI, Agentic AI, GitHub Copilot, Claude, JIRA, Confluence, Microsoft Excel / Google Sheets, Visio, Notion, Gliffy, Trello

Functional Skills: Requirements Gathering & Elicitation, Requirements Analysis, BRD/FRD/PRD, Backlog Grooming & Prioritisation, Agile Delivery (Scrum), Sprint Planning & Ceremonies, User Stories & Acceptance Criteria (Vertical Slicing), Stakeholder Management, Multi-Region Stakeholder Communication, Client Workshops, Gap Analysis, Impact & Risk Analysis, Root Cause & Defect Trend Analysis, Data-Backed Analysis and Decision Making, Compliance Gap Identification, Reusable Solution Design, Process Standardisation, UAT Strategy & Ownership, Cross-Functional Collaboration, Team Mentoring, Community Leadership

EDUCATION

B.Tech, Biotechnology, Jaypee University of Information Technology

2019 - 2023, Solan, India

CERTIFICATIONS

Certified Scrum Product Owner (CSPO®), Scrum Alliance | SQL (Intermediate), HackerRank

ACHIEVEMENTS

- **Spot Award, Aug 2026, FNZ Technology:** recognised for clarity and reliability on the latest solution designs.
- Recognised by senior leadership for naturally leading a cross-functional proof of concept, coordinating developers, analyst testers, and participants, including more senior colleagues.
- Recognised by product leadership for a significant contribution that helped drive a cross-functional delivery through to completion.
- Designed and delivered 2 org-wide knowledge-sharing sessions on industry messaging standards and platform capabilities, reaching 400+ professionals.
- **Spot Award, Nov 2024, Rxlogix Corporation:** recognised for consistent performance and rigorous quality control, including proactively identifying requirement gaps that reduced client-side defects.
- **Spot Award, Feb 2024, Rxlogix Corporation:** recognised for strong first-year performance and delivery quality, contributing to minimal client-side defects.
