

MUSKAAN KHURANA

Business Analyst | Product Strategy | CSPO®

Gurugram, India | khuranamuskaan13@gmail.com | +91 9813291401 | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Business Analyst with experience across regulated industries, spanning payments-focused fintech and pharmacovigilance. Bridges business, product, and engineering, translating complex functional and regulatory requirements into implementable system behavior for engineering teams. Designed and standardized reusable payment capabilities instead of one-off fixes, cutting new-implementation time by 67%, and led an AI-assisted documentation initiative that cut SME dependency by 83%, now adopted as a formal standard. Applies GenAI tools directly to daily analytical work, cutting solution-design review time by ~75% while retaining full human validation of every output. Drives Agile backlog strategy and UAT planning alongside Product Owners, and represents technical solutions directly to client audiences.

PROFESSIONAL EXPERIENCE

Business Analyst, FNZ Technology May 2025 - Present

Gurugram, India

- Owned end-to-end business analysis for a reusable payments integration platform built as a single point of change for future regulatory updates, cutting new-implementation time by **67%** and enabling faster, more consistent onboarding across concurrent client engagements.
- Prioritized** competing requirements from clients, stakeholders, and regulatory compliance, sequencing a fixed regulatory deadline and external commitments ahead of an internally proposed innovation initiative, hitting the compliance deadline with **zero slippage**.
- Owned sprint backlog prioritization** across **4 parallel projects** sharing a common domain model, protecting downstream delivery commitments by maintaining full sprint delivery under competing capacity demands and timelines, in partnership with the Scrum Master.
- Led** a cross-functional evaluation of an AI-assisted documentation process, defining success criteria and governance; the approach cut SME dependency by **83%**, accelerated defect resolution by **66%**, and was adopted as a formal organizational standard.
- Designed configurable REST APIs for a new multi-tenant platform, enabling project-specific integration fields while minimizing API rework for future project onboarding through a reusable integration layer.
- Applied AI-assisted workflows to compare and analyze multiple solution design documents, reducing analysis time by **~75%** while retaining human validation of AI-generated findings.
- Authored user stories and acceptance criteria for a global wealth management platform, reducing downstream requirement clarifications by **~60%** and shortening requirement turnaround by 20%.
- Defined a risk-based UAT strategy** that prioritized high-risk business scenarios, cutting test execution effort by **~50%** while preserving full regulatory coverage.
- Delivered functional solution design across **6 concurrent regional implementations** spanning **2 jurisdictions** in EU and UK markets, including one with a hard regulatory go-live deadline, specifying system behavior for engineering and leading workshops with external clients and internal stakeholders to pressure-test design early.
- Designed and delivered** 2 org-wide knowledge-sharing sessions, scaling domain expertise across **400+ professionals** in industry messaging standards and platform capabilities.

Business Quality Analyst, Rxlogix Corporation

Mar 2023 - May 2025

Noida, India

- Translated complex regulatory and business requirements into clear user stories and acceptance criteria, reducing requirement-related defects by **~20%** through early gap identification.
- Caught requirement gaps before they reached QA, sustaining **95%+ defect-free** delivery across compliance-driven releases in a highly regulated environment, helping secure a client contract renewal accompanied by positive client feedback.
- Led SQL-based defect trend and root-cause analysis to drive data-backed prioritization decisions alongside the Product Owner, reducing recurring issues by **~15%** and accelerating feature delivery timelines by **20%**.
- Mentored 7 new team members on BA-QA best practices, defect management, and stakeholder collaboration, shortening onboarding time.

SKILLS

Technical Skills: SQL-Based Analysis, REST API Design & Specification, Postman, Insomnia, Generative AI, Agentic AI, GitHub Copilot, Claude, JIRA, Confluence, Microsoft Excel / Google Sheets, Visio, Notion, Gliffy, Trello

Functional Skills: Requirements Gathering & Elicitation, Requirements Analysis, BRD/FRD/PRD, Backlog Grooming & Prioritization, Sprint Planning & Ceremonies, User Stories & Acceptance Criteria (Vertical Slicing), Stakeholder Management, Multi-Region Stakeholder Communication, Client Workshops, Gap Analysis, Impact & Risk Analysis, Root Cause & Defect Trend Analysis, Data-Backed Analysis and Decision Making, Compliance Gap Identification, Reusable Solution Design, Process Standardization, UAT Strategy & Ownership, Cross-Functional Collaboration, Team Mentoring, Community Leadership

EDUCATION

B.Tech, Biotechnology, Jaypee University of Information Technology 2019 - 2023, Solan, India

CERTIFICATIONS

Certified Scrum Product Owner (CSPO®), Scrum Alliance | SQL (Intermediate), HackerRank

ACHIEVEMENTS

- **Spot Award, Aug 2026, FNZ Technology:** recognized for clarity and reliability on the latest solution designs.
- Recognized by senior leadership for naturally leading a cross-functional proof of concept, coordinating developers, analyst testers, and participants, including more senior colleagues.
- Recognized by product leadership for a significant contribution that helped drive a cross-functional delivery through to completion.
- **Spot Award, Nov 2024, Rxlogix Corporation:** recognized for consistent performance and rigorous quality control, including proactively identifying requirement gaps that reduced client-side defects.
- **Spot Award, Feb 2024, Rxlogix Corporation:** recognized for strong first-year performance and delivery quality, contributing to minimal client-side defects.
